

SmartDrive Systems Limited

In-vehicle Safety and Operations Programme

Who we are

Established in 2004, SmartDrive Systems delivers video-based Safety and Operations solutions making it easy for commercial fleet and safety managers to reduce the frequency, severity and financial impact of collisions, whilst improving driver productivity.

We're a U.S. headquartered company, with operations extending to the UK, China, India, Australia and New Zealand.

Our current client base includes companies involved in areas such as short haul freight, waste management, third party logistics, courier services, and telecommunications.

What we offer

Our straight forward to deploy SmartDrive Safety and Operations Programme has proven to dramatically reduce avoidable accident frequency and associated cost, as well as the potential to reduce maintenance costs and fuel consumption, all through modifying driver behaviour.

The system is entirely automated and web based, allowing easy, quick and secure access to driver data and reports, 24-hours a day.

Our commitment to you

As an Allianz customer, you're entitled to receive a 10% discount on our SmartDrive Safety and Operations Programme products.

Further discounts are available on large commercial fleets, comprising 250+ vehicles.

Our product range

SmartDrive Safety is a unique video-based fleet safety programme that utilizes G-Force and GPS-based data to enable managers to get a true picture of what's really happening on the road. The programme includes SmartDrive expert reviewers that evaluate every 30-second video event with behavior and risk-scoring—pinpointing areas for improvement. SmartDrive Safety tackles risky driving proactively, helping managers coach drivers to improve performance and enhance safety. Benchmarking is possible across drivers, locations, and divisions.

Backed by video evidence, safe drivers can be rewarded and drivers displaying unsafe behaviour can be counselled using our integrated web based coaching and training modules.

Video evidence can assist in the claims process, whether by expedition, exoneration, proving fault, or identifying fraudulent claims.

SmartDrive Operations leverages the same innovative technology as SmartDrive Safety to help improve operational efficiency. SmartDrive Operations accurately measures wasted fuel events, and provides fleet managers with the data and tools they need to coach drivers to improve efficiency - delivering control over excessive idling points, speeding, off-hours use and off-route activity - all from the same hardware and software platform.

We also provide you with a dedicated manager, responsible for weekly summary reports outlining trends by location and high risk driving behaviour.
